The Burden of Diabetes in Oklahoma

Diabetes is an epidemic in the United States. According to the Centers for Disease Control and Prevention (CDC), over 30 million Americans have diabetes and face its devastating consequences. What’s true nationwide is also true in Oklahoma.

OKLAHOMA’S DIABETES EPIDEMIC:
Approximately 446,000 people in Oklahoma, or 14.1% of the adult population, have diabetes.

- Of these, an estimated 100,000 have diabetes but don’t know it, greatly increasing their health risk.
- In addition, 1,036,000 people in Oklahoma, 36.9% of the adult population, have prediabetes with blood glucose levels higher than normal but not yet high enough to be diagnosed as diabetes.
- Every year an estimated 26,000 people in Oklahoma are diagnosed with diabetes.

DIABETES IS EXPENSIVE:
People with diabetes have medical expenses approximately 2.3 times higher than those who do not have diabetes.

- Total direct medical expenses for diagnosed diabetes in Oklahoma were estimated at $2.8 billion in 2017.
- In addition, another $1 billion was spent on indirect costs from lost productivity due to diabetes.

IMPROVING LIVES, PREVENTING DIABETES AND FINDING A CURE:
In 2018, the National Institute of Diabetes and Digestive and Kidney Diseases at the National Institutes of Health invested $1,614,038 in diabetes-related research projects in Oklahoma.

The Division of Diabetes Translation at the CDC provided $2,125,315 in diabetes prevention and educational grants in Oklahoma in 2018.
