The Burden of Diabetes in Wyoming

Diabetes is an epidemic in the United States. According to the Centers for Disease Control and Prevention (CDC), over 30 million Americans have diabetes and face its devastating consequences. What’s true nationwide is also true in Wyoming.

WYOMING’S DIABETES EPIDEMIC:
Approximately 52,000 people in Wyoming, or 10.6% of the adult population, have diabetes.

- Of these, an estimated 14,000 have diabetes but don’t know it, greatly increasing their health risk.
- In addition, 153,000 people in Wyoming, 35.7% of the adult population, have prediabetes with blood glucose levels higher than normal but not yet high enough to be diagnosed as diabetes.
- Every year an estimated 3,000 people in Wyoming are diagnosed with diabetes.

DIABETES IS EXPENSIVE:
People with diabetes have medical expenses approximately 2.3 times higher than those who do not have diabetes.

- Total direct medical expenses for diagnosed diabetes in Wyoming were estimated at $310 million in 2017.
- In addition, another $110 million was spent on indirect costs from lost productivity due to diabetes.

IMPROVING LIVES, PREVENTING DIABETES AND FINDING A CURE:
In 2018, the National Institute of Diabetes and Digestive and Kidney Diseases at the National Institutes of Health invested $223,848 in diabetes-related research projects in Wyoming.

The Division of Diabetes Translation at the CDC provided $867,789 in diabetes prevention and educational grants in Wyoming in 2018.
