

The Burden of Diabetes in South Carolina

Diabetes is an epidemic in the United States. According to the Centers for Disease Control and Prevention (CDC), over 37 million Americans have diabetes and face its devastating consequences. What's true nationwide is also true in South Carolina.

South Carolina's diabetes epidemic:

- Approximately 558,570 people in South Carolina, or 13.5% of the adult population, have diagnosed diabetes.
- An additional 123,000 people in South Carolina have diabetes but don't know it, greatly increasing their health risk.

 There are 1,361,000 people in South Carolina, 34.9% of the adult population, who have prediabetes with blood glucose levels that are higher than normal but not yet high enough to be diagnosed as diabetes.

Every year an estimated 31,168 people in South Carolina are diagnosed with diabetes.

Diabetes is expensive:

People with diabetes have **medical expenses approximately 2.3 times higher** than those who do not have diabetes.

- Total direct medical expenses for diagnosed diabetes in South Carolina were estimated at \$4.3 billion in 2017.
- In addition, another **\$1.6 billion** was spent on **indirect costs** from lost productivity due to diabetes.

Improving lives, preventing diabetes and finding a cure:

In 2023, the **National Institute of Diabetes and Digestive and Kidney Diseases** at the National Institutes of Health invested **\$1,236,362** in diabetes-related research projects in South Carolina. The **Division of Diabetes Translation** at the CDC provided **\$2,375,294** in diabetes prevention and educational grants in South Carolina in 2021.
